

OSHA HAZARD COMMUNICATION

In order to reduce the frequency of chemical source illnesses and injuries on the job, OSHA requires, through 29 CFR 1910.120, the development and implementation of a Hazard Communication Program. This enables employers and employees to recognize and protect themselves from work hazards. Overviews and applications of the standard are presented.

TOTAL TIME: 4 HOURS

SAFT-0300 SCHEDULE

- Overview of the Standard
- Responsibility of Staff
- Hazardous Chemicals Identification
- Hazard Communication Program: Preparation and Implementation
 - Labels and other Precautions
 - Material Safety Data Sheets (MSDS)
 - Employee Information and Training
- Other Requirements
- Checklist for Compliance
- OSHA Assistance

All students may receive:

- Seminar Workbook
- OSHA Handouts
- Certificate of Completion (to participants who achieve 80% or higher on the final test)
- Certificate of Attendance (to participants who do not achieve 80% or higher on the final test).

Students must be present for the entire duration of the class to receive a certificate.
