

OSHA PREVENTION OF SILICOSIS

Each day, numerous surface coal miners, rock drillers, driller helpers, employers of drillers and rill rig manufacturers, sand blasters, and other construction workers are exposed to respirable crystalline silica. These exposures can cause serious or fatal respiratory diseases, particularly silicosis. This course describes OSHA's Special Emphasis Program (SEP) for Silicosis. The emphases are on safety and health factors for working with silica and preventing and minimizing of exposures.

TOTAL TIME: 2 HOURS

SAFT-0302 SCHEDULE

- Overview
- Crystalline Silica (Quartz)
- Silicosis
 - Symptoms
 - Exposure Prevention
 - OSHA
 - Employees
- Rock Drillers and Surface Mining Processes
 - Exposure Mechanisms
 - Current Exposure Limits
